West Bank Barrier Route Projections

July 2010

Area Affected

The Barrier's total length is 707 km, more than twice the length of the 1949 Armistice Line (Green Line) between the West Bank and Israel.

The total area located between the Barrier and the Green Line is 9.4% of the West Bank, including East Jerusalem and No Man's Land.

When completed, approximately 15% of the Barrier will be constructed on the Green Line or in Israel with 85% inside the West Bank.

Populations Affected

If the Barrier is completed based on the current route:

Approximately 30,000 Palestinians holding West Bank ID cards in 36 communities will be located between the Barrier and the Green Line.

The majority of Palestinians with East Jerusalem ID cards will reside between the Barrier and the Green Line. However, Palestinian communities inside the current municipal boundary, Katr Aqab and Shu'fat Camp, are separated from East Jerusalem by the Barrier.

Approximately 126,000 Palestinians will be surrounded by the Barrier on three sides. These comprise 31 communities; the Biddya and Biddu areas, and the city of Qalqilya.

Approximately 28,000 Palestinians in 9 communities in the Az Zawiya and Bir Nabala Enclaves will be surrounded on four sides by the Barrier, with a tunnel or road connection to the rest of the West Bank.

Barrier Route

- Completed (434 km or 61.4%)
- Under construction (80 km or 8.4%)
- Planned (213 km or 30.1%)
